

COSMETIC TATTOO CONSULT GUIDE

BROW TATTOO & LIP BLUSH
BY MASTER ARTIST JASMINE

Techniques

What is cosmetic tattoo and what does it involve?

Cosmetic tattooing is a semi-permanent cosmetic procedure. It involves tattooing specialised pigments into the upper layers of the skin using a manual blade or machine tattoo gun.

FEATHER STROKE MICROBLADING

Hair-like feather strokes using a microblading manual tool to create a natural and soft style brow. Suitable for normal/dry and young skin types. Will look like a real brow with no makeup when healed.

COMBINATION

Combination of feather stroke microblading and machine shading through the arch and tail for added definition and fullness.

OMBRÉ POWDER

Ombre or Powder style brows when healed looks like a soft tint to the skin. Perfect for those with oily or thin skins or for those who wear brow makeup often. This technique is machine shading only.

LIP BLUSH

Lip blush tattoo is designed to have a soft tint to the lips once healed. Added definition to the border can help balance out lip shape. This is a very comfortable procedure with minimal downtime.

COLOUR & SHAPE

There is no one shoe that fits all when it comes to cosmetic tattooing. Each design is tailored individually to you! Your face is unique to you and we want the most natural and flattering result for your face shape and colouring.

We use special brow rulers to determine by the exact mill the shape and design of your new brows. We base the start, arch and end points off your bone structure (nose and eyes). This ensures that they will suit you. The thickness and curve of the brow is then pencilled out for your approval before beginning the procedure.

In regards to the colour of the brow pigment used we always keep it safer the first procedure. We can always add more, going darker at the 6 week touch up is always the best option rather than ever risking going too dark. During the beginning of your appointment we place 4 pigment colour choices on your forehead to check what undertone your skin will throw (pink, olive or grey) and to determine which colour will be best ensuring we are not going too dark yet dark enough to allow for the 50% fading to occur during the healing process.

Lip blush is a great way to add the illusion of a fuller lip. We can not tattoo outside of your natural lip border as the pigment will heal differently due to the different skin textures and will look fused and not defined. Most people's lip border is uneven and by tattooing right to the outer point we can add that definition needed which will make the lips appear fuller.

There is a huge range of lip pigments available and we can mix and match to create a custom shade. If you have a favourite lipstick that you want to replicate bring that along with you or a picture of your desired colour and we can customise the perfect shade for you. Lips fade up to 60% during the healing process so a darker/brighter colour is needed at the initial procedure.

PRE- PROCEDURE & AFTERCARE

The pre-procedure care and aftercare is just as important as the procedure itself. Make sure you understand the following before making an appointment.

PRE-PROCEDURE INFORMATION

Leading up to your procedure we recommend the following to ensure the best possible results on the day.

- No waxing, threading or tinting your brows a minimum 2 weeks before
- No facials of any type 2 weeks before
- No Botox or fillers a minimum 2 weeks before
- Avoid the sun and no fake tan 7-10days before
- Blood thinning medication such as Asprin or Nurofen must be stopped 48 hours before (doctors approval must be granted for prescription medication)
- No alcohol, coffee or exercise 24hours before
- No children or plus ones to your appointment due to strict skin penetration laws

AFTERCARE

At the end of your procedure you will be given the full aftercare information in card form and a goodie bag with all the products needed to look after your new brows/lips.

We recommend the following for 10 days after your procedure.

- No wetting your face under the water in the shower and no sub-merging under water eg swimming, spas or saunas.
- No itchy and picking
- No sweating including exercise
- Avoid sunlight eg no beach, wear a hat when going for a walk
- No makeup in the brows (face is ok)

FAQ

1.

How long does cosmetic tattooing last?

Individual results will vary. Semi permanent makeup can last anywhere between 6-12 months to 2-3 years depending on skin type and lifestyle. Following aftercare correctly is important to maintain as much retention as possible. We recommend a refresh every 12-18 months to boost colour.

2.

Does cosmetic tattooing hurt?

Everyone's pain tolerance is different. Most clients feel none to only minimal discomfort.

Upon booking you will receive a link to purchase your numbing cream from a compounding chemist which is sent to the salon for application upon your arrival to your appointment. This numbing cream must be purchased by you so it is legally in your name and medically prescribed to you and you only.

3.

Will I need a touch up?

Your cosmetic tattoo procedure is a two step process. A \$100 perfection touch up at 6-8 weeks post procedure is compulsory to perfect your eyebrow or lip tattoo procedure. Due to some pigment losing retention or possible gaps forming after the healing process it is very important to see Jasmine around the 6 week mark to correct any needed areas. Touch up's after 12 weeks (before 6 months) from the first initial procedure will have an extra cost involved.

4.

Is there risk of infection?

There is very minimal risk of infection due to very strict hygiene standards used in each procedure. Needles are sterile and only used once. To prevent cross-contamination Jasmine wears sterile gloves and practices extreme caution and disposable items. Strict aftercare instructions are given to the client at the end of the procedure.

5.

Who is cosmetic tattooing not suitable for?

Pregnant or breastfeeding women. Chemotherapy patients. Prone to keloid scarring. Diabetic type 1.

Dermatitis or eczema in the brows. Sunburnt or very sensitive skin. Keratosis. Must be over 18 years of age.

Please contact Jasmine for a full list or if you have any concerns or questions.

6.

What should I expect after the procedure?

Immediately after the treatment the brows will look dark and bold. Over the next 7-10 days they will go dark, then begin the healing process of peeling and flaking. You may feel like you are losing pigment but it will return approximately 3-4 weeks later. They will become itchy as they heal. Jasmine will go through this in detail at the end of your appointment.

7.

Is a deposit needed upon booking?

Yes. A \$50 deposit is required at the time of your booking to secure appointment spot. Deposits are non-refundable. The deposit can be transferred to a new date if appointment is rescheduled outside of the 48 hour cancellation time frame before the original appointment.

PRICING & HOW TO BOOK

CONSULTATION
- COMPLIMENTARY

FEATHER STROKE
\$450
